

Air Fryer Salmon

An air-fryer staple with under 5 simple ingredients, a quick cook time, and great nutrition.

DIFFICULTY

Easy

Salmon in the air fryer doesn't get much simpler — brush a filet with olive oil, season, and air fry for about 12 minutes. The key is leaving the skin on while it cooks: it keeps the juices locked in and prevents the salmon from drying out. Great as a toddler-friendly first fish, and just as easy to marinate in teriyaki or bbq sauce for extra flavor.

The Salmon

Brushed and seasoned before air frying

Salmon filet, skin on 1

Extra virgin olive oil to brush

Salt, pepper, garlic powder sprinkle

Recipe yields 2 filets — use one filet per serving, scaling seasoning to taste.

Finishing

Added right before and after cooking

Avocado oil spray light spray

Sesame seeds, garnish (optional) to taste

Directions

PREP & SEASON

- 1 Preheat air fryer to 380°F.
- 2 Brush salmon filet with olive oil and sprinkle with a dash of salt, pepper, and garlic powder.
- 3 Spray lightly with avocado oil.

AIR FRY & SERVE

- 1 Air fry skin-side down for about 12 minutes, until the thickest part reaches 145°F.
- 2 Let cool slightly, garnish with sesame seeds if desired, and serve. Store leftovers in an air-tight container in the fridge for 2–3 days.

Tips & Variations

- Leave the skin on while cooking — it keeps the salmon from drying out. Remove it after cooking if you prefer.
- Cook times vary by air fryer; start checking around 10 minutes and pull once the thickest part hits 145°F.
- For extra flavor, marinate the salmon a few hours ahead in teriyaki or bbq sauce instead of the olive oil and seasoning.
